STORY • ALL LEVELS

The night the stars went silent

Read alone or aloud, then answer the questions.

Evening was falling on the six worlds when Bibou noticed something strange: not a single star was shining. Plouf popped his head out of the water, Léo pricked up his ears, Astro checked his screen, Rex sniffed the wind and Gauvain raised his lantern. In the middle of the sky floated a small, trembling light. “It’s afraid to shine all alone,” Bibou realised. So each friend gave a sparkle from their world: a pearl from the ocean, a leaf from the jungle, a speck of comet dust, a volcanic stone and a spark from the castle. The little light grew, then drew a golden path between the worlds. One by one, the stars lit up again. The six friends understood that courage isn’t never being afraid: it’s moving forward together, even when the night seems endless.

QUESTIONS

1. What does Bibou notice at the start of the story?

2. Name two objects given by the friends.

3. Why does the little light tremble?

4. Explain the last sentence in your own words.
