   Working: Answer:

10. A potion for 4 people needs 300 g of honey. How much honey is needed for 10 people?

    Working: Answer:

Answer key

1. **3 × 12 = 36, then 36 − 5 = 31**: He has 31 arrows left.
2. **2 × 15.50 = 31**: He pays $31.
3. **3 × 1.2 = 3.6**: He walks 3.6 km.
4. **20 ÷ 5 = 4 kg per horse, then 8 × 4 = 32**: 8 horses eat 32 kg of hay.
5. **20 − 12.75 = 7.25**: He gets $7.25 in change.
6. **144 ÷ 8 = 18**: 18 tables are needed.
7. **80 ÷ 4 = 20, then 3 × 20 = 60**: 60 knights carry a blue shield.
8. **2:35 + 1:50 = 4:25**: It ends at 4:25 pm.
9. **3 × 9.90 = 29.70, then 50 − 29.70 = 20.30**: He has $20.30 left.
10. **300 ÷ 4 = 75 g per person, then 10 × 75 = 750**: 750 g of honey are needed.
